

Evaluation criteria for the Berblinger Competition 2016

By resolution of the Berblinger Jury of 27th November 2014

Criteria	Weighting of Parameters
	(Total 100 %)
Environmental sustainability	25 %
Future potential	20 %
Power/effectiveness	25 %
Suitability for daily use	10 %
Intrinsic quality of application documents	20 %

Application documents must include a verifiable quantification of improvements with respect to currently employed technologies.

Significantly inferior partial evaluations may lead to the overall result being downgraded.
